MEGHANA AGNUR

Frontend Developer • Software Builder • Applied AI / ML

Pune, India • meghanaagnur@gmail.com • linkedin.com/in/meghana-agnur • github.com/meghanaagnur • x.com/meghanaagnur

EDUCATION

AISSMS Institute of Information Technology (AISSMS IOIT) — Pune, India

Bachelor of Technology (B.Tech) in Information Technology • **CGPA: 9.35 / 10.0** (First Year) — 2024 – 2028

TECHNICAL SKILLS

Languages: Python, C++

Frontend & Mobile: React.js, Next.js, Flutter, Tailwind CSS, Radix UI, Playwright

Backend & Storage: Node.js, Express.js, Firebase, ChromaDB (Vector DB), REST APIs, web3.py

AI & Developer Tools: Ollama / Mistral 7B, Git, GitHub, Vercel

FEATURED PROJECTS

VaariSarthi: Pilgrim Group Tracking & Safety Platform — Top 100 Finalist

Flutter, Firebase, Google Maps SDK, Twilio SMS API

- Engineered a safety tracking app for 1M+ pilgrims across the 250 to 300km Pandharpur Wari pilgrimage.
- Implemented real time GPS tracking with drift alerts, SOS emergency SMS dispatching, and bilingual (Marathi/English) UI.
- Integrated AI assisted lost and found matching to reconnect separated pilgrims with their groups.

Codence: AI Architectural Decision Records (ADR) at PR Review — Hackathon Finalist

Next.js, Tailwind CSS, Node.js, ChromaDB, Ollama / Mistral 7B

- Built an automated knowledge-capture system conducting interactive AI voice interviews with developers during pull requests.
- Vectorized discussions into ChromaDB via local Mistral 7B models, enabling cited conversational search on codebase history.

VibeCheck: Deterministic Code Output Auditing Engine — Working Prototype

Next.js, Node.js, Playwright, Python

- Created a deterministic evaluation pipeline detecting gaps between prompt specifications and rendered front-end code.
- Replaced circular LLM-as-a-judge patterns with deterministic DOM and AST diffing via headless Playwright automation.

EXPERIENCE & OPEN SOURCE FELLOWSHIPS

Open Source Contributor • Open Source Community India (OSCI) & SWOC — Sep 2026 – Present

- Contributed to **GitMastery**: built print-friendly cheat sheet export, dual-render DOM workarounds for Radix UI, and German/English i18n support.
- Active contributor in **Social Winter of Code (SWOC)**: triaged issues, submitted PRs, and collaborated on open Git workflows.

Selected Student & Mentee • Code in Place, Stanford University — 2026 – Ongoing

- Selected into Stanford University's global CS initiative; completed advanced Python algorithmic thinking and computational problem-solving under Stanford instructors.

Global Fellow & Aspire Leader • Aspire Institute, DoraDAO & Codess.Cafe — 2026

- **Aspire Leaders Program:** Selected for global leadership initiative founded by Harvard Business School faculty; engaged in cross-cultural problem-solving.
- **DoraDAO (Girls Who Yap):** Completed intensive fellowship for women building in AI and Web3, delivering weekly build challenges and rapid prototypes.
- **Codess.Cafe:** Active mentee engaging in technical interview prep, peer mentorship, and collaborative coding sessions.

LEADERSHIP & CAMPUS INVOLVEMENT

Joint Secretary (Anchoring Domain) • Training & Placement (T&P) Cell, AISSMS IOIT — Ongoing

- Coordinated anchoring and communication for campus placement drives and college-wide hackathons (Tecathon).

Project Team Member • AWS Student Building Group (AWS SBG), AISSMS IOIT — Ongoing

- Collaborated on hands-on cloud computing workshops, DevOps pipelines, and AI/ML project architecture.
